### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3617

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-8, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evenden et al in view of Zilka et al and Peterson. Evenden et al disclose the basic claimed structure including an assembly inflated through the use of a windsock, with an inflatable body 14, a windsock 10, and a tube lanyard 15. Not disclosed by Evenden et al is raft. Zilka et al teach a raft. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the inflatable device of Evenden et al as a raft for increased floatation. Evenden et al also do not clearly disclose a valve. Peterson teaches a valve 40 and a plug 60. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Evenden et al with a valve and plug as taught by Peterson for improved air holding. Additionally, the valve of Peterson appears to be a conventional flapper valve, if it is not it would have been an obvious choice of engineering design to a person of ordinary skill in the art at the time the invention was made would have been to form the valve as a flapper valve for ease of use.

3. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Evenden et al in view of Zilka et al and Peterson as applied to claim 1 above, and further in view of Filsouf. Evenden et al do not disclose a fill tube closure. Filsouf teaches a fill tube 309 with a closure 303. It would have been obvious to a person of ordinary skill in the

art at the time the invention was made to form the fill tube of Evenden et al with a closure as taught by Filsouf for ease of use.

4. Claims 3, 10, and 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
